Sec. 1. (a) The department presumes that used oil is to be recycled unless a used oil handler disposes of used oil or sends used oil for disposal. Except as provided in section 2 of this rule, this article applies to used oil, and to materials identified in this section as being subject to regulation as used oil, whether or not the used oil or material exhibits any characteristics of hazardous waste identified in 40 CFR 261 Subpart C.

(b) Mixtures of used oil and hazardous waste must be handled as follows:

(1) For mixtures of used oil with a listed hazardous waste, the following shall apply:

(A) Mixtures of used oil and hazardous waste that is listed in 40 CFR 261 Subpart D are subject to regulation as hazardous waste under 329 IAC 3.1 rather than as used oil under this article.

(B) Used oil containing more than one thousand (1,000) parts per million total halogens is presumed to be a hazardous waste because it has been mixed with halogenated hazardous waste listed in 40 CFR 261 Subpart D. Persons may rebut this presumption by demonstrating that the used oil does not contain hazardous waste. For example, this may be done by using an analytical method from EPA publication SW-846, Third Edition, to show that the used oil does not contain significant concentrations of halogenated hazardous constituents listed in 40 CFR 261 Appendix VIII. EPA publication SW-846, Third Edition, is available from the Government Printing Office, Superintendent of Documents, P.O. Box 371954, Pittsburgh, Pennsylvania 15250-7954, (202) 783-3238. Request document number 955-001-00000-1. The rebuttable presumption does not apply to the following:

(i) Metalworking oils or fluids containing chlorinated paraffins, if they are processed, through a tolling arrangement as described in 329 IAC 13-4-5(c), to reclaim metalworking oils or fluids. The presumption does apply to metalworking oils or fluids if such oils or fluids are recycled in any other manner or disposed.

(ii) Used oils contaminated with chlorofluorocarbons (CFCs) removed from refrigeration units where the CFCs are destined for reclamation. The rebuttable presumption does apply to used oils contaminated with CFCs that have been mixed with used oil from sources other than refrigeration units.

(2) Used oil mixed with characteristic hazardous waste identified in 40 CFR 261 Subpart C are subject to 329 IAC 3.1.

(3) Mixtures of used oil and conditionally exempt small quantity generator hazardous waste regulated under 40 CFR 261.5 are subject to regulation as used oil under this article.

(c) Materials containing or otherwise contaminated with used oil must be handled as follows:

(1) Except as provided in subdivision (2), materials containing or otherwise contaminated with used oil from which the used oil has been properly drained or removed to the extent possible such that no visible signs of free-flowing oil remain in or on the material:

(A) are not used oil and thus not subject to this article;

(B) if applicable, are subject to the hazardous waste regulations under 329 IAC 3.1; and

(C) if applicable, are subject to the ~~special~~ **solid** waste regulations under 329 IAC 10 **and 329 IAC 11**.

(2) Materials containing or otherwise contaminated with used oil that are burned for energy recovery are subject to regulation as used oil under this article.

(3) Used oil drained or removed from materials containing or otherwise contaminated with used oil is subject to regulation as used oil under this article.

(d) Mixtures of used oil with products must be handled as follows:

(1) Except as provided in subdivision (2), mixtures of used oil and fuels or other fuel products are subject to regulation as used oil under this article.

(2) Mixtures of used oil and diesel fuel mixed on-site by the generator of the used oil for use in the generator’s own vehicles are not subject to this article once the used oil and diesel fuel have been mixed. Prior to mixing, the used oil is subject to the requirements of 329 IAC 13-4.

(e) Materials derived from used oil must be handled as follows:

(1) Materials that are reclaimed from used oil that are used beneficially and are not burned for energy recovery or used in a manner constituting disposal, such as re-refined lubricants, are:

(A) not used oil and thus are not subject to this article; and

(B) not solid wastes and are thus not subject to the hazardous waste regulations under 329 IAC 3.1 as provided in 40 CFR 261.3(c)(2)(A).

(2) Materials produced from used oil that are burned for energy recovery, such as used oil fuels, are subject to regulation as used oil under this article.

(3) Except as provided in subdivision (4), materials derived from used oil that are disposed of or used in a manner constituting disposal are:

(A) not used oil and thus are not subject to this article; and

(B) are solid wastes and thus are subject to:

(i) if applicable, the hazardous waste regulations under 329 IAC 3.1 if the materials are listed or identified as hazardous waste; and

(ii) if applicable, the ~~special solid~~ waste regulations under 329 IAC 10 and **329 IAC 11**.

(4) Used oil re-refining distillation bottoms that are used as feedstock to manufacture asphalt products are not subject to this article.

(f) Wastewater, the discharge of which is subject to regulation under either Section 402 or 307(b) of the Clean Water Act, including wastewaters at facilities that have eliminated the discharge of wastewater, contaminated with de minimis quantities of used oil are not subject to the requirements of this article. As used in this subsection, “de minimis quantities of used oils” means small spills, leaks, or drippings from pumps, machinery, pipes, and other similar equipment during normal operations or small amounts of oil lost to the wastewater treatment system during washing or draining operations. This exception will not apply if the used oil is discarded as a result of abnormal manufacturing operations resulting in substantial leaks, spills, or other releases, or to used oil recovered from wastewaters.

(g) Used oil introduced into crude oil pipelines or a petroleum refining facility must be handled as follows:

(1) Used oil mixed with crude oil or natural gas liquids, such as in a production separator or crude oil stock tank, for insertion into a crude oil pipeline is exempt from the requirements of this article. The used oil is subject to the requirements of this article prior to the mixing of used oil with crude oil or natural gas liquids.

(2) Mixtures of used oil and crude oil or natural gas liquids containing less than one percent (1%) used oil that are being stored or transported to a crude oil pipeline or petroleum refining facility for insertion into the refining process at a point prior to crude distillation or catalytic cracking are exempt from the requirements of this article.

(3) Used oil that is inserted into the petroleum refining facility process before crude distillation or catalytic cracking without prior mixing with crude oil is exempt from the requirements of this article provided that the used oil constitutes less than one percent (1%) of the crude oil feed to any petroleum refining facility process unit at any given time. Prior to insertion into the petroleum refining facility process, the used oil is subject to the requirements of this article.

(4) Except as provided in subdivision (5), used oil that is introduced into a petroleum refining facility process after crude distillation or catalytic cracking is exempt from the requirements of this article only if the used oil meets the specification of section 2 of this rule. Prior to insertion into the petroleum refining facility process, the used oil is subject to the requirements of this article.

(5) Used oil that is incidentally captured by a hydrocarbon recovery system or wastewater treatment system as an article of routine process operations at a petroleum refining facility and inserted into the petroleum refining facility process is exempt from the requirements of this article. This exemption does not extend to used oil that is intentionally introduced into a hydrocarbon recovery system, such as by pouring collected used oil into the wastewater treatment system.

(6) Tank bottoms from stock tanks containing exempt mixtures of used oil and crude oil or natural gas liquids are exempt from the requirements of this article.

(h) Used oil produced on vessels from normal shipboard operations is not subject to this article until it is transported ashore.

(i) In addition to the requirements of this article, marketers and burners of used oil who market used oil containing any quantifiable level of polychlorinated biphenyls (PCBs) are subject to the requirements found at 40 CFR 761.20(e). Sec. 2. Used oil burned for energy recovery, and any fuel produced from used oil by processing, blending, or other treatment, is subject to regulation under this article unless it is shown not to exceed any of the allowable levels of the constituents and properties in the specification shown in Table 1. Once used oil that is to be burned for energy recovery has been shown not to exceed any specification and the person making that showing complies with 329 IAC 13-9-3, 329 IAC 13-9-4, and 329 IAC 13-9-5(b), the used oil is no longer subject to this article.

Table 1-Used Oil not Exceeding any Specification Level is not Subject to this Article when Burned for Energy Recovery¹

Constituent or Property	Allowable Level
Arsenic	5 ppm maximum
Cadmium	2 ppm maximum
Chromium	10 ppm maximum
Lead	100 ppm maximum
Flash point	100°F minimum
Total halogens	4,000 ppm maximum ²

¹The specification does not apply to mixtures of used oil and hazardous waste that continue to be regulated as hazardous waste (See section 1(b) of this rule.).

²Used oil containing more than one thousand (1,000) parts per million total halogens is presumed to be a hazardous waste under the rebuttable presumption provided under section 1(b) of this rule. Such used oil is subject to 40 CFR 266 Subpart H rather than this article when burned for energy recovery unless the presumption of mixing can be successfully rebutted.

Note: Applicable standards for the burning of used oil containing PCBs are imposed by 40 CFR 761.20(e) (Solid Waste Management Board; 329 IAC 13-3-2; filed Feb 3, 1997, 9:15 a.m.; 20 IR 1495; readopted filed Sep 7, 2001, 1:35 p.m.; 25 IR 287)

SECTION 47. 329 IAC 13-3-3 IS READOPTED AS FOLLOWS:

329 IAC 13-3-3 Prohibitions

Authority: IC 13-14-8-1; IC 13-14-8-2; IC 13-19-3

Affected: IC 13-11-2; IC 13-14; IC 13-19; IC 13-20; IC 13-22; IC 13-23; IC 13-30; 40 CFR 260.10; 40 CFR 264; 40 CFR 265

Sec. 3. (a) Used oil shall not be managed in surface impoundments or waste piles unless the units are subject to regulation under 40 CFR 264 or 40 CFR 265.

(b) The use of used oil as a dust suppressant is prohibited.

(c) Off-specification used oil fuel may be burned for energy recovery in only the following devices:

(1) Industrial furnaces identified in 40 CFR 260.10.

(2) Boilers, as defined in 40 CFR 260.10, that are identified as any of the following:

(A) Industrial boilers located on the site of a facility engaged in a manufacturing process where substances are transformed into new products, including the component parts of products, by mechanical or chemical processes.

(B) Utility boilers used to produce electric power, steam, heated or cooled air, or other gases or fluids for sale.

(C) Used oil-fired space heaters provided that the burner meets the provisions of 329 IAC 13-4-4.

(3) Hazardous waste incinerators subject to regulation under 40 CFR 264 Subpart O or 40 CFR 265.

(Solid Waste Management Board; 329 IAC 13-3-3; filed Feb 3, 1997, 9:15 a.m.; 20 IR 1496; readopted filed Sep 7, 2001, 1:35 p.m.; 25 IR 239)
